

Accubid Anywhere

One simple subscription does it all: Estimating - Graphical Takeoff - Integrated Material Pricing

HOSTED SOLUTION

Trimble Accubid Anywhere® is the first of its kind, a fully hosted, hassle free IT experience. Click and go, connecting from anywhere at any time which allows you to focus on what you do best, win work!

THE FULL PACKAGE

Accubid Anywhere offers robust estimating features such as true multiuser and multi-branch support, allowing seamless collaboration between departments both simultaneously and without restrictions. Powerful specification, assembly and item libraries hold the key item material and attribute information so that you only manage a few fields at the time of takeoff. Using intuitive and customizable takeoff pads, graphic shortcuts allow you to quickly select items and assemblies for takeoff.

Change Management allows you to draw from your existing database of contract estimates to start new contract documents. Use multiple pricing methods to accommodate list and net pricing, plus overhead and markups. Quickly produce customizable, professional-looking change-order reports for quick submission and approval.

Seamlessly integrate and markup digital image files to streamline your takeoff process. In addition, the powerful AutoCount feature, automatically counts symbols, dramatically reducing takeoff time and improves accuracy.

Finally, fully integrated pricing technology gives you the tools to ensure up-to-date pricing for all of your projects.

ESTIMATING WITH CONFIDENCE

Updates to takeoffs are viewed in real time, allowing you to verify results immediately. A job consolidated bill of material and closeout screens can be viewed and edited, without having to run a report. Additionally, data validation instantly informs you of any issues or conflicts in a takeoff.

Dynamic assemblies allow you to save time at takeoff and maintain consistency within your organization. And, through the use of Intelligent Assemblies and Specifications, the number of assemblies required is drastically reduced. Once your bid has been awarded, you can break an estimate down into any structure to create a Schedule of Values, enabling you to take advantage of some of the best reporting capabilities available. You will create professional reports that aggregate and analyze data from across the entire project. With the Enhanced ReportWriter you can quickly create custom reports with your company logo.

Benefits

- ▶ Dongle-free licensing
- ▶ SaaS Subscription
 - ▶ Easily scalable
 - ▶ Always accessible
 - ▶ Cost-effective
 - ▶ Secure
- ▶ Using Advanced Performance Technology
- ▶ Integrated supplier pricing ensures bid accuracy
- ▶ Bi-directional link to graphical takeoff
- ▶ Access multiple industry standard laboring methods or customize your own
- ▶ Flexible job specifications
- ▶ Easily pivoted data
- ▶ Effortless team collaboration
- ▶ Standard and customized Reports
- ▶ Powerful assembly variables
- ▶ Supplier Xchange
- ▶ Submittal Manager
